

Remote Clienteling

While stores are temporarily closing and consumers are being encouraged to stay home, retailers are in need of new innovative remote and ecommerce solutions designed to manage the current economic realities.

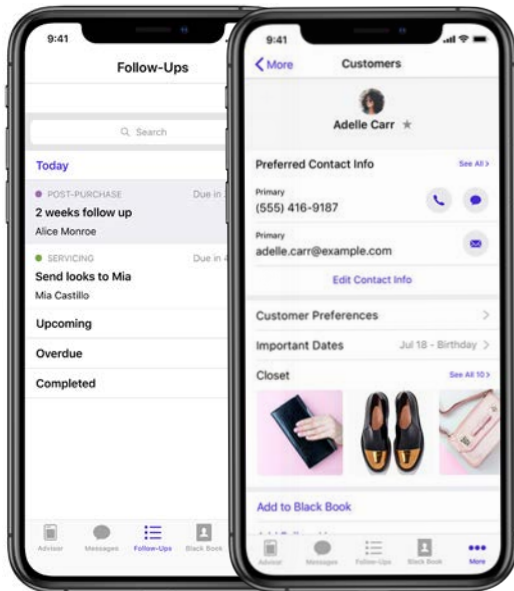

Remote Clienteling App enables store associates to maintain continuous customer relationships with loyal brand customers while working remotely. Armed with valuable customer insights, associates working from home can use their intel to personalize messages to their key customers and deliver a unique online experience.

Tulip's **Remote Clienteling App** provides one-on-one interaction where associates can share updates, offers, discounts, recommendations or answer questions in real-time. They can also send ecommerce products to customers, which will then be credited back to the associate.

Create New Sales Opportunities

- Increase ecommerce sales during store closures
- Enhance the customer shopping experience with personalized communication
- Promote in-store visits for when physical locations reopen

Benefits

- Easy set up
- Access to ecommerce catalog
- Rapid implementation
- Low capital investment
